

HydroPump

Push-Pump Chemical Dispenser

The HydroPump is a uniquely designed push pump used to dispense cleaning chemicals into sinks, buckets or any other cleaning receptacle. Used wherever dispensing of products is desired, the HydroPump allows the operator to control the amount of product yielded.

The HydroPump can be used in any kitchen, janitor's closet or laundry facility. By pushing the pump once, the desired chemical is effectively and efficiently directed into the appropriate container or sink compartment.

- Resistant to most chemicals including chlorine, so you won't need to stock two models
- Field-adjustable to deliver 1/2, 3/4 or 1 oz. per push
- Recovers quickly to maintain accuracy if multiple doses are required
- Product can be stored up to one foot above the pump for use in confined spaces

Perfect for

- Sink applications
- Manual dosing
- Places where water connections are not easy
- Where backflow regulations are a problem

Ordering Information

| Model # | Description |
|----------|---|
| 616 | HydroPump with directional, no-drip discharge spout |
| 617 | HydroPump with PVC discharge tubing |
| 10083222 | Adapter plate |
