Laundry Chemical
Dispensers for a Variety
of Applications

Pro Manual Laundry

Two-Pump Dispensing System

Viking is leading the industry with field-proven laundry systems. Viking's compact Pro Laundry Dispensers are backed by a solid one-year warranty and use reliable AC motors. The features throughout the line will enable you to feed chemicals to a variety of machines from a home-style machine to a 200 pound microprocessor machine.

LAUNDRY CONTROL

Common Applications

Viking's laundry dispensers are perfect for machines ranging in size from top-loading home-style machines to 200-pound front-loading on-premise machines. Other applications include new wet/dry cleaning machines, large animal cage washing machines, and car washes. Call for feasibility of other applications.

Viking Laundry Systems Sales Sheet

System	Number of Pumps Available	Standard/Optional Pump Outputs	Power Requirements	Trigger	Run Time Available	Delay & Lockout	Applications
Pro Laundry	1-6	18oz. (522ml) per minute	110-volt source (units are shipped with power cord installed)	24-240 volts AC or DC	Up to 3 1/2 minutes per pump	Delay comes standard on all pumps	Dry cleaning applications, top loader/home-style machines, and up to 200 pound washers
Pro Relay Laundry	1-6	18oz. (522ml) per minute	110-volt source (units are shipped with power cord installed)	24-240 volts AC or DC	Dependent on trigger duration	—	Microprocessor laundry machines up to 200 pounds
Pro Manual Laundry	1-3	18oz. (522ml) per minute	110-volt source (units are shipped with power cord installed)	Push button switch for each product on remote box starts pump	Up to 3 1/2 minutes per pump	Every pump has a 3 minute lockout built in for use if necessary	Top Loaders

Note: All pump outputs listed are based on water. Product viscosity as well as the length and rise of the run will reduce actual output

DEMA V-Line

The Multi-Feature Premium Laundry Dispenser for Smaller Facilities

V-Line is the perfect on-premise laundry system for smaller facilities where value and flexibility are critical but performance must be second to none. V-Line features a modular design to accommodate up to 6 pumps and uses the proven performance of DEMA's standard Quick Change Blue Pump at 16 ounce (475 ml) per minute or the Large Blue QC Pump for 50 ounces (1500 ml) per minute.
