

CF-300

Solid Chemical Dissolver

The CF-300 dissolves solid or screen packed granular cleaning chemicals that are used in commercial dishwashers, pot sinks, flatware pre-soak tubs or mop buckets. The compact and lightweight dissolver is molded of durable, chemically resistant, glass-filled polypropylene. Each unit includes all the parts necessary for either a wall-mount or top-mount installation.

- Perfect for wall or top mount applications
- Up to 24 dosing periods per day
- Resistant to internal chemical build-up
- Reliable spray diverter ensures maximum safety

System Features

Accurate Nozzle Placement

The spray nozzle is located at the optimum point below the capsule's opening to ensure no chemical build-up.

Convenient Mounting

The four wall mount holes have been arranged in a pattern that allows the unit to replace others bowls without drilling new holes. Can be top or wall mounted.

No Chemical Build-Up

The system's interior drains freely and completely to reduce chemical residue build-up. The optional Swirl-Clean Spray Tube swirls water to further eliminate chemical build-up.

Selectable Spray Pattern

With four different nozzles to choose from, the spray pattern can be set-up to optimize the dispensing of virtually any solid or screen packed powder.

Complete Installation Kit

All of the parts and pieces required for installation are included. An optional metal vacuum breaker is also available.

Corrosion Resistant

The bowl is molded of high-impact, glass-filled polypropylene and will provide years of trouble-free service.
